

SC5

 **SUNSUNDEGUI**

SC5

The new multipurpose coach is characterized by its versatility and multifunctionality.

It is developed for commuter service, school or business transportation, and for traveling long distances.

Today we've done it again, as the SC5 takes to the road: **design, safety, ergonomics and maintenance ...**

SC5 → design

DESIGN

→ Panoramic front window

- *maximum forward visibility from all seats.*
- *Optikool thermal treatment.*

→ Extra tinted double side windows standard.

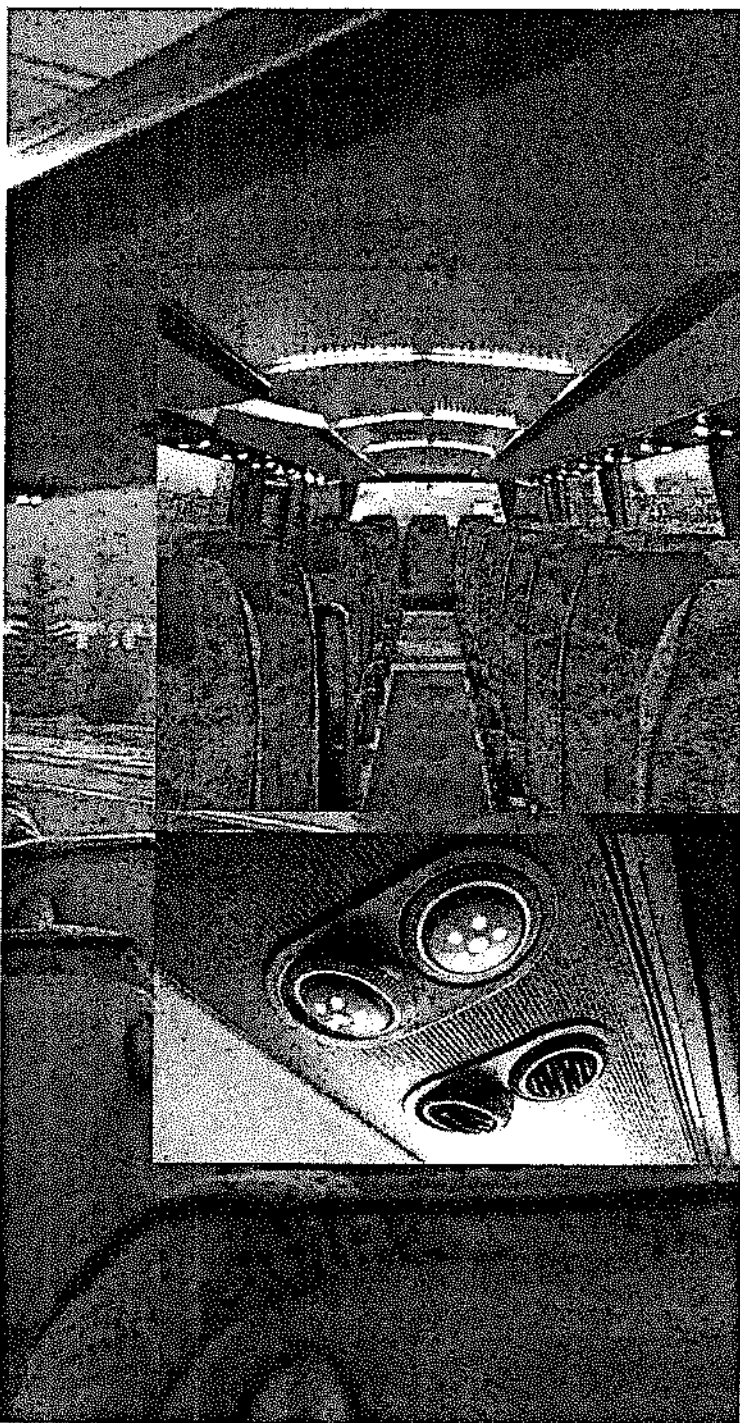

→ Spacious and bright, easy to clean interior.

→ Interior lighting by LEDs.

→ Standard entertainment system with CD/DVD player, USB jack, digital amplifier and integrated multifunction display. Two 19" LCD monitors standard.

→ Integrated door opening system in the front door panel.

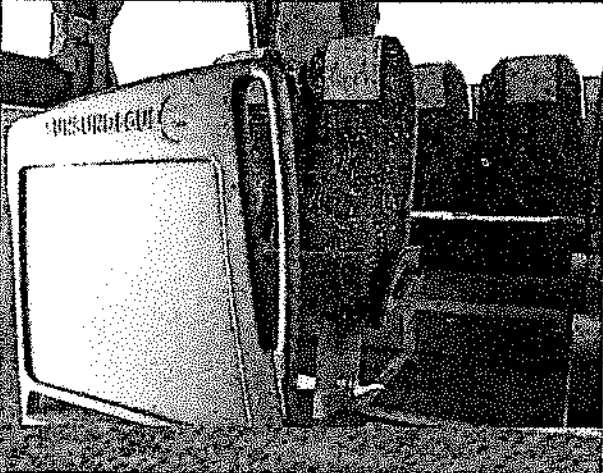

→ New multiplexed architecture that includes climate control and connection to the chassis, with troubleshooting diagnostic system standard on all vehicles displayed on the dashboard screen.

SC5 | **SAFETY**

SAFETY

→ The SC5 body structure complies with rollover regulations (Regulation R66.02)

→ Front reinforced structure for shock absorption that provides greater protection to the driver and guide area.

→ Mirrors:

- *Collision System: with a moderate bump, both the inside and outside mirrors descend.*
- *Maximum visibility. Adjustable.*
- *In compliance with current school guidelines.*

→ Inner fenders with greater strain capacity provide extra protection for passengers on impact.

→ Strategically located rearview camera.

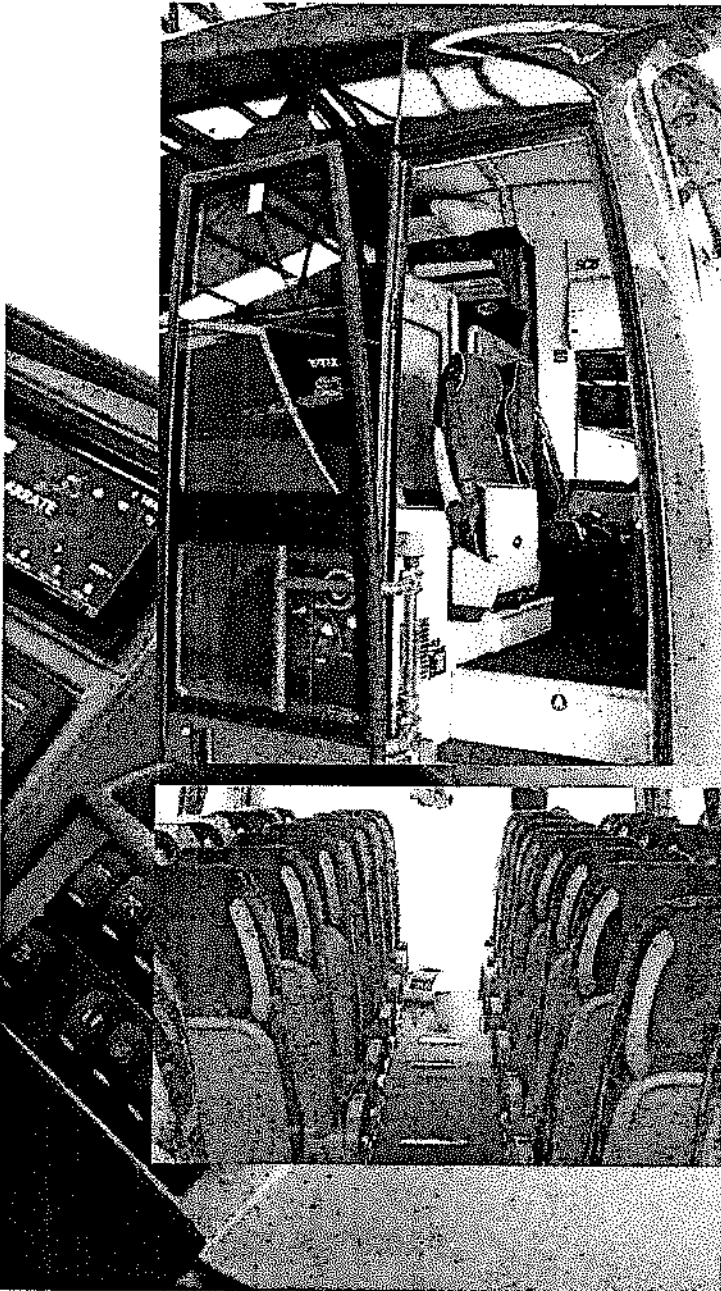

→ Front and forward bumper ready for installation of automatic braking and lane change systems.

SC5

→ **ERGONOMY**
→ **COMFORT**

ERGONOMY - COMFORT

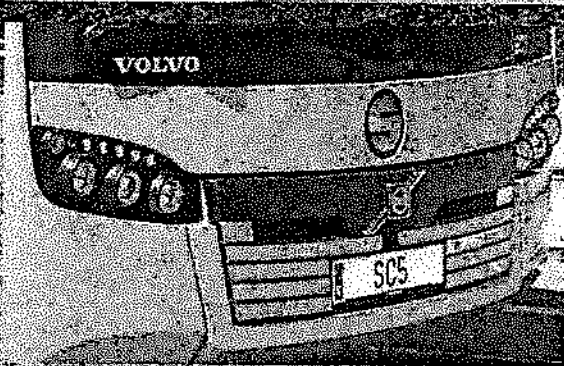

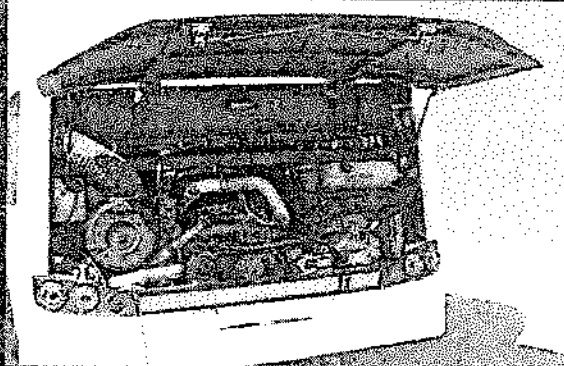

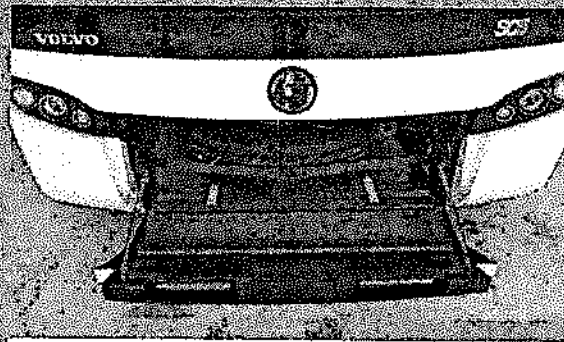

- Solid, quiet structure.
- Large access inside the vehicle, with steps that provide a visual contrast to their immediate surroundings.
- Side-mounted guide's seat, more ergonomic with a 3-point seat belt".
- Ample driver's area.
- Strategic mirror locations allow for greater visibility without straining. Motorized one-piece shades on the windshield, with visibility and a non-transparent strip at the top.
- Versatile interior (luggage rack, lights, vents and individual lights ...)
- Four locations for electronic signboards: on the dashboard, above the windshield, at the side and the rear.

SC5 | maintenance

maintenance

- Easy maintenance access to front and rear lights, spare wheel and tailgate.
- New bi halogen headlamps standard. Optional headlamps with bi-LED technology last 10 times longer than bi xenon, with less maintenance. LED daytime running lights.
- Standard front and rear fog lamps.
- Standard LED Taillights

- Engine cover with optimized ventilation ready to meet the increased ventilation requirements of the new euro 6 chassis.
- Electrical switchboards (for both chassis and body) are unified in one place, accessible from the outside.
- Modular, easy maintenance design of installations (electrical, heating, air conditioning, chassis ... etc.)

SC5

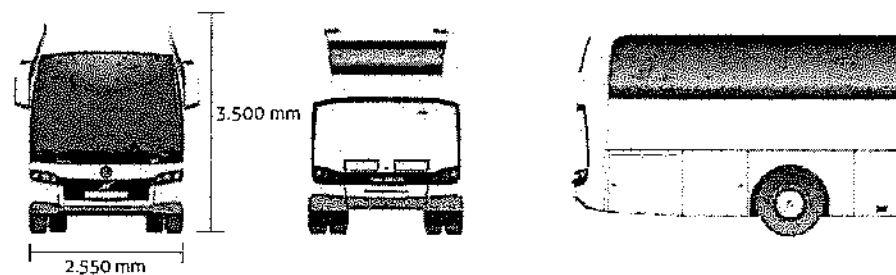

TECHNICAL
DATA
